Welcome to the Tribus Group

mobility for everyone

Make mobility possible for **everyone**

In a globalised world it is our goal to enhance people's mobility. We achieve this goal by providing a full range of highly reliable mobility solutions that meet passengers' needs, whether they travel in a wheelchair or not. Our business model is really quite simple: we design, we innovate, we manufacture and offer suitable mobility solutions at a competitive price, to the highest quality standards and always delivered on time. Our innovation talents are focussed on the develop-

ment and manufacturing of products that put quality and efficiency, customers' demands and passengers' wishes first. While the foundation of our company lies in the Netherlands, our ambition is to broaden our horizon and direct our sales focus onto the international market, aiming to become one of the leading minibus manufacturers in the world.

Iddo Verweij | CEO Tribus Group

Our core values

Innovation

Innovation gives us a competitive advantage. We promote collaboration and sharing of ideas across our business.

Sustainability

Being responsible is essential to what we do. We are committed to minimising our impact on the environment.

Dedication

Our business depends on healthy relationships with customers, business partners and suppliers.

Reliability

We are proud of our reputation, built over many years, based on integrity and living up to our promises.

Core values

First EU-guidelines compliant M1-minibuses

Tribus builds the first minibuses that meet the new M1 EU Directive 74/408, 76/115, 77/541, 78/932. These minibuses are equipped with stainless steel tracks for fitting seats and wheelchairs. Crash-tested seats with three-point seat belts.

1998

1999

First Dutch M1 Folding seat

Tribus is first to introduce the M1 folding seat in the Netherlands. Flexible, foldable seats which are not only ergonomically designed but very comfortable as well.

2003

User friendly Folding Seats with integrated belt

The new user-friendly Flexus Folding Seat has an integrated headrest and an integrated three-point seat belt. The seats are fitted with adjustable armrests. It takes only two simple steps to fold up the seats in order to create more space.

2004

2005

Founding of Tribus

Three former employees take the challenging initiative to relaunch Q-bus, a former semi-public corporation. When negotiations prove unsuccessful, they decide to start a brand new company: Tribus BV

Introducing new standard wheelchair restraint system

This new wheelchair restraint system has four retractors that tighten themselves when the release button is pressed or by turning the hand wheel. This feature saves a considerable amount of time when a wheelchair is being secured and minimises physical contact between driver and passenger during the process of securing.

Introduction Triflexfloor

Tribus introduces the Triflex-floor: a multifunctional aluminium M1 floor consisting of several airline rails to create a flexible layout for seating and wheelchairs. The floor is secured to the body by means of an adhesive bond and a few bolts at the back.

Highlights

Tribus continues to innovate with the development of TriflexPLUS®. A new and patented wheelchair restraint system in which the tensioning belts are integrated in the floor. These self-tensioning belts are operated mechanically by means of a central lever in the floor. Nothing could be easier.

Introduction TriflexPLUS

2009

Tribus unites past and new innovations in a comprehensive system for wheelchair passengers. TriflexAIR distinguishes itself by safety, design, comfort and fuel economy.

Introduction TriflexAIR

2011

No more adjusting your seat belts manually using booster seats. The New Generation belt adjusts itself to the height of the passenger. Tight, firm and safe!

New Generation belt

2013

2015

2007

New concept: Low Floor minibus

Tribus develops a brand new chassis for minibuses, a new concept that has no steps to the entrance. The low floor improves accessibility of the bus for the public, particularly the elderly and those in wheelchairs.

Introduction Civitas

The Civitas is the first series of low-floor minibuses developed especially for public transport providers. The Civitas (based on the Fiat Ducato) can carry up to 20 passengers: 10 seated and 10 standing, and provides accommodation for a wheelchair user.

Safety check control

This electronic secure system not only ensures a secure check of the wheelchair restraints, but also of the seat belts. This electronic secure system warns the driver in case of incorrect use.

We continue
innovating

Tribus and innovation

Safe, easy to use & sustainable solutions

Tribus products are developed with the aid of the latest computer technology by highly qualified engineers, creative designers and passionate customers. With our know-how we aim to provide you with the best possible technology in pursuit of the best solution. Continuous focus on innovation has been the key to the company's strong growth over the last decade. Every year, we invest a significant amount in safer, easy to use and sustainable solutions.

Herman Rigterink | Director Technology

Innovations

Low floor chassis concept

Developed for public transport and includes a multifunctional area with a low floor that is ideal for use as standing room or for wheelchairs.

Safety check control

This electronic secure system ensures a secure check of both the wheelchair restraints, and the seat belts. This electronic secure system warns the driver in case of incorrect use.

Lowered front entrance

This one-piece reinforced polyester solution was miles ahead of the competition in terms of improved access, reliability and durability. No welding, secured through an adhesive bond and bolts.

Integrated wheelchair restraint system

Securing and releasing wheelchairs is now an easy task for the driver, requiring no physical exertion.

TriflexAIR®

TriflexAIR set a new standard in passenger safety and wheelchair transport! Not only because of its exceptional user-friendliness, but also because of its ultra light construction, ensuring considerable fuel savings.

XXL-belts

This solution with extra long webbing restraints provides more room for manoeuvre for the wheelchair and driver especially when having more than one wheelchair in the minibus.

New Generation belt®

No more adjusting your seat belts manually using booster seats. The New Generation belt adjusts itself to the height of the passenger. Tight, firm and safe!

We pride ourselves on **Customer Satisfaction**

With a Customer Satisfaction Score of 99%, our customer service is not a department, it's everyone's job

Our markets

Wheelchair accessible minibuses

We offer Wheelchair Accessible Minibuses for the product range of many manufacturers. Each conversion is tailored to satisfy your specific needs and requirements.

Seating Systems

With our seating range we can provide solutions for M1 as well as M2 minibuses. All seats have integrated 3-point belts and are tested in accordance with the latest regulations.

Low Floor minibuses

Exclusively developed for public transport and include a multifunctional area with a low floor that is ideal for use as standing room or for wheelchairs.

Our solutions

Wheelchair accessible cars

Tribus offers several conversion kits for various cars to convert them into a multifunctional passenger car suitable for wheelchair transportation.

Flooring Systems

We offer a wide array of approved flooring systems. From simple and flexible to fully integrated systems. All systems provide exceptional safety for all passengers, regardless of their physical limitations.

Special projects

We offer solutions for OEM. These products are very specific and used in niche markets. These co-operations are based on a long-term relationship.

Flexible & fast production

Optimization of manufacturability, performance and reliability

Flexible & fast production

Wheelchair accessible minibuses

We offer Wheelchair Accessible Minibuses for the product range of many manufacturers. Each conversion is tailored to satisfy your specific needs and requirements.

Sprinter / Crafter / Ducato / Master / Transit

Multifunctional

Our products range from a compact single wheelchair accessible minibus (WAM) to larger vehicles accommodating up to six wheelchairs. A large variety of seating and wheelchair configurations are available to meet your specific needs. All layouts are fully tested to Low Volume Type Approval or European Type Approval.

Endless possibilities

If there is a need for a specific configuration, we can happily accommodate this with our flexible Seat Layout Program (SLP)

Features

Besides standard conversion, we offer a number of additional options:

- Air-condition
- Heating
- Lifts
- Sliding steps
- Lowered entry
- Panoramic windows
- Electric doors and many more...

Wheelchair accessible cars

Tribus offers several conversion kits for various cars to convert them into a multifunctional car suitable for wheelchair transportation. All our activities are conducted in conformance with M1 European regulations and the guidelines provided by the various vehicle manufacturers involved.

Wheelchair accessible cars

Multifunctional cars

For families with one member who is dependent on a wheelchair, a vehicle with a lowered floor is the perfect solution for spacious and comfortable transportation. The Caddy Maxi, for example, easily accommodates five seated passengers and one wheelchair passenger. When the wheelchair space is not in use, the Caddy Maxi - in combination with the special ramp - offers lots of space for luggage.

Flexible configuration

The seating configuration is flexible. Depending on the type, the vehicle has either three individual seats or a split rear bench. Depending on the wheelchair you can opt for a combination of wheelchair with separate seats or bench.

Options

- **ECO-fuel**, modification of the original Caddy CNG model.
- **Extra TriflexAIR folding seats** on the third row.

Low Floor minibuses

We offer a range of Low Floor minibuses, exclusively developed for public transport. All include a multifunctional area with a low floor that is ideal for use as standing room or for a wheelchair.

Civitas / New Civitas / Civitas Economy

NEWCIVITAS
ECONOMY

Versatility

With its high windows, low floor, large capacity and fully equipped driver's cabin, the Civitas is the unparalleled, multi-faceted solution for small-scale passenger transport. The Civitas is at home anywhere. Let us surprise you with its possibilities.

Light & space

What makes Civitas truly special is the comfort in travelling it provides its passengers and driver. The panoramic windows offer a wide view of the outdoors and provide a pleasant atmosphere that is spacious and full of light. The long (LED) lighting strips on the ceiling further enhance this effect. The seats, with integrated three-point seat belts, have been designed in accordance with strict ergonomic guidelines and can transform even a long ride into a pleasant journey.

Complete

The Civitas has a fully equipped driver's cabin, which is fitted with all of the latest developments in public transport. The passenger area is directly accessible from the driver's cabin.

Seating systems

Owing to years of experience in manufacturing M1 seats, we at Tri-bus realise that safe seating can be a matter of life or death. In close collaboration with our Research and Development department we therefore attempt to anticipate and implement new developments before demand arises.

Flexus / TriflexAIR seats

TriflexAIR 

Maximum comfort

All Seat Fixtures, removable or semi-permanent, are tested and approved in combination with our Flooring Systems in accordance with M1 Standards.

- * Ergonomic & slimline design
- * Very easy to fold/unfold
- * Standard Removable Seat Fixture
- * Simple T-bolts for semi-permanent layouts
- * Tested and approved

Ultra lightweight

We are proud to say "the TriflexAIR seat is the lightest available M1 folding seat in the world!" With just 20 kg this seat contributes to a lower weight of the vehicle and therefore saves fuel. Our M1 folding Seats in combination with our Flooring Systems -make it possible to quickly and easily convert a standard vehicle into a multifunctional Wheelchair Accessible Vehicle.

New Generation seatbelt

This nice feature (patented) really does do the trick. No more adjusting your seat belts manually using booster seats. The New Generation belt adjusts itself to the height of the passenger. Tight, firm and safe!

FlexusPro

Flooring systems

We offer a wide array of approved flooring systems. From simple and flexible to fully integrated systems. Each system provides safe transport for all passengers, regardless of their physical limitations. The latest flooring system, TriflexAIR, sets a new standard in passenger safety and wheelchair transport! Not only because of its exceptional user-friendliness, but also because of its ultra light construction saving lots of fuel.

TriflexFloor / TriflexAIR

TriflexAIR   European Patent Office

TriflexAIR: Easy

The TriflexAIR floor is a complete and user-friendly wheelchair restraint system for minibuses that provides safe, completely equivalent and comfortable transport for all passengers, regardless of their physical limitations. With TriflexAIR, securing and releasing wheelchairs is a simple task for the driver, requiring no physical exertion. The folding seats are effortlessly folded away to free up space for wheelchairs.

User friendly

Thanks to TriflexAIR securing wheelchairs in a wheelchair minibus is now made even easier. The wheelchair locking system is fully incorporated into the floor and completely self-tensioning – continually securing the wheelchair while driving. A simple movement of your hand to the central lever is sufficient to unlock all four retractor belts at once. The height-adjustable three-point belt further adds to the system's user-friendliness.

TriflexFloor: Flexibility

Our Triflexfloor provides maximum flexibility. The aluminium profiles are clicked together with or without airline tracks. This lightweight floor combines seat fixtures and wheelchair restraints in every possible way, and has received certified approval for 16 different vehicle models from 11 major manufacturers.

TriflexFloor

Special Projects

With the expertise and many years of experience Tribus has at its disposal, we are in a unique position to serve those markets that demand special products. As the industry's leader of vehicle adaptation and creators of innovation - we have unparalleled skills and expertise in building the most complex and technologically advanced minibuses on the road today.

Special Projects

Endless possibilities!

For many years, we have dedicated our experience and resources to implementing special demands. Special projects vary in their complexity, whether it is a simple enhancement of an existing product or a complete Zero Emission mobility solution, our engineering and design team have unparalleled skills and expertise in building the most complex, technologically advanced minibuses on the road today.

Dedication

For many years, we have dedicated our experience and resources to provide first class service to all our customers. Equally important to our success are the many people employed here. Their skills, experience and dedication have greatly contributed to the growth of Tribus.

We love dedication

we ^a dedication

we ^a satisfaction

Satisfaction

Thousands of satisfied customers consider our mobility solutions to be very customer oriented, user-friendly, efficient and high quality. We are very proud of our customer care record as client surveys show year after year. We hold our clients in high regard and we are known to them as a reputable, quality organisation with an unrivalled and proven track record.
